

Audio/Visual Equipment in the Cripps Court Auditorium

Audio:

- The lectern has a built in microphone and also houses the main volume control for the sound system.
- The PA system is available with a selection of up to 12 microphones (including 7 table microphones, 3 lapel microphones, and 2 handheld microphones for amplified audience questions)
- Facilities are available to play audio in a number of formats (CD, DVD, cassette tape and standard computer files).

Visual:

- The lectern is equipped with a Windows 10 computer with Office 2016 professional installed.
- The PC has full Internet access.
- Speaker's Laptop computer can be used as a projection source, connection is via standard VGA and 3.5mm stereo connectors
- Video projection for DVD & VHS formats
- Over-head projection is available via a Visualiser (this can be used with acetates or plain paper)
- 35mm slide projection (dual projection can be arranged at additional cost)

The lectern has a built in touch screen control panel which allows the speaker control of the lighting, sound and switching between the various audio and visual devices.

Please visit our website www.magd.cam.ac.uk/conferences/auditorium.html to view images of the auditorium and lectern

If you have a specific requirement which does not appear to be catered for here please contact the Conference Office and we will arrange for one of our technicians to discuss your requirements with you.

Session Recording

Audio Visual recording is available of your session and can be written to DVD, CD or memory stick. This does require a technician to be present.

Facilities:

- Audio Loop system
- Tiered seating for 142 delegates
- Wireless Internet connectivity
